FLATBOX M-One

M-One is for the connoisseur who wants a near perfect sound quality without imposing on a carefully designed home. Their minimalistic, contemporary design is subtle while their sound takes full advantage of all our breakthrough design technology.

M as in Music

The Flatbox M-Series is love at first sight. Never before have you seen anything like them mounted on a wall. And if there is such a thing as a tension to sound, it is when you turn the volume right up on the M-Two. The presence is almost overwhelming. Put on Supertramp's "School", and singer Roger Hodgson will be standing right there.

New sound design technology

A high-end loudspeaker is made up of a hundred perfect details like cast driver baskets and air coil low loss inductors, but it's the Waveguide and Time Alignment design technologies developed exclusively for the M-series that is magic behind the sound. The waveguide allows for better coupling between the tweeter diaphragm and surrounding air to reduce baffle edge diffraction. And since the tweeter is integrated into the grille design, there are no other edge reflections.

Perfect sound needs perfect timing

Basically, Time Alignment Technology means mounting the tweeter and the mid/woofer drivers perfectly on the depth axis to let all sound reach you ear at exactly the same millisecond. In theory this might seem easy but making it happen is altogether more difficult. But it was worth the entire 3247 hours designer Mats Andersen put into developing the M Series.

So you can listen happily ever after...

NEW

FLATBOX M-Two

With DLS it's simple – the bigger the speaker, the bigger the sound, whilst still keeping the character and tonality. Simply, M-Two is our flagship. No compromises. No shortcuts. The M-Two design will demand your attention; the sound will never let it go.

FLATBOX SLIM MINI

Flatbox Slim Mini is the perfect alternative if you want something really small and flat on your wall. Use them as extra speakers in a multi room system; the small and flat design makes them fit everywhere. To get a full and rich sound we strongly recommend them to be used in combination with an active subwoofer, like the Flatbox 8 or Flatsub 8 Large.

FLATBOX SLIM LARGE

Flatbox Slim Large is the smaller brother to Flatbox Large and can be used in many different ways, as front speakers, rear speakers or as a centre in a surround system. The perfect alternative if you want a smaller speaker with a big sound.

FLATBOX MINI

Flatbox Mini, with the flat design, is the perfect alternative to In-wall speakers. The design allows you to place them anywhere you want. You can also use them as extra speakers in a multi room system; the flat design makes them fit everywhere.

FLATBOX MIDI

Flatbox Midi, a little bit bigger than the Mini, still with the flat design, is the perfect alternative to In-wall speakers. This amazing speaker has an optimized shape for performance with a wide frequency response.

FLATBOX LARGE

Flatbox Large can be used in many different ways, as front speakers, rear speakers or even as a centre in a surround system. The perfect alternative if you want small speakers with a superb sound; the flat design makes them fit everywhere.

FLATBOX XL

Flatbox XL can be used in many different ways, as front speakers, rear speakers or even as a centre in a surround system. The perfect alternative if you want small speakers with a superb sound; the flat design makes them fit everywhere.

ACTIVE SUBWOOFERS

FLATSUB 8 is the perfect choice if you want to hang your sub on the wall, or hide it away under a chair or a sofa. The small dimensions make it easy to hide this active subwoofer wherever you want. The Flatsub 8 matches DLS speakers superbly. Both white and black speaker fronts are included.

FLATSUB 8 LARGE is the perfect alternative if you want more and deeper bass sound from a wall hanged subwoofer. The small dimensions make it easy to hide this active subwoofer wherever you want. The Flatsub 8 Large matches DLS speakers superbly. Both white and black speaker fronts are included.

BLUETOOTH 2.1

NEW

FLATSUB Stereo-One is an efficient, active subwoofer with a built-in class D power amplifier for the subwoofer, and a stereo amplifier for a pair of Flatbox speakers. It is designed to use as a single amplifier unit. The subwoofer allows great freedom in placement. With the controls you can adjust level for front system, level for subwoofer, crossover frequency and Bass EQ, which makes it easy to adjust for the acoustics in your listening room. A bluetooth receiver is included for wireless streaming from your smartphone, tablet or computer.
