## IC521

With the good off-axis sound they are perfect to place where you simply want to listen to quality sound. Let's say when you're entertaining guests on your terrace or cooking dinner. That's where they does its job best, in any public space – a café, a shop or an office. This 5" speaker is perfect if the space is limited. The front grille is attached to the frame with neodymium magnets.

## IC611

For ceiling mount in classical round shape suitable for any use. Use as extra speakers in your kitchen or bath room, or as surround speakers in home cinema. If you have a surround amplifier with multi room function these speakers are very well suited for this application. They are well suited for installations in the bath room thanks to the aluminum front grille.

## IC624

The speakers are made with only high class components making them suitable for use in most environments. Use as extra speakers in your kitchen. They can also be used as surround speakers in home cinema. If you have a surround amplifier with multi room function these speakers are very well suited for this application. The front grille is attached to the frame with neodymium magnets.

## IC623 -slim

These speakers are made for installation where depth is limited, 65 mm installation depth is enough. Use as extra speakers in your kitchen or elsewhere. They can also be used as surround speakers in home cinema. If you have a surround amplifier with multi-room function these speakers are very well suited for this application. The front grille is attached to the frame with neodymium magnets.

## IC824

A popular 8" model that creates a good bass and has now been improved with a new design. The frame around the speaker is slim to give an exclusive look. The sound quality is still of the highest quality that have been our best selling point throughout the years. The front grille is attached to the frame with neodymium magnets.

## IWX6.2

The **IWX 6.2** is a unique speaker. To improve the sound for maximum performance we have mounted both the bass driver and the tweeter in a wooden baffle. The oval shape together with the textile grille gives the installation an exclusive look that fits in everywhere. The tweeter level is adjustable in four steps to give the best performance in any installation.

## IW2.4

The square IW2.4 is a small In-wall speaker for installation if the installation space is limited.

A 2-way component kit with the tweeter separated from the bass/mid-range to provide the best possible sound. Why not install them in the cabinet plinth. The front grille is attached to the frame with neodymium magnets.

## IW2.6

The square IW2.6 is normally installed in a wall, but can be installed wherever you require good sound. These are 2-way component kits with the tweeter separated from the bass/mid-range to provide the best possible sound. We strongly recommend these if you're using them in your home cinema system. The front grille is attached to the frame with neodymium magnets.

## SINGLE STEREO SPEAKER

IC646 with grille

IC646 without grille

## IC646

Connect both stereo channels to a single speaker. The bass driver has dual voice coils and two separate angled tweeters for best stereo image. Perfect as extra speaker in small areas like kitchen, bath rooms or small rooms where two separate speakers are difficult to install. This exclusive speaker has two 20 mm silk dome tweeters. The front grille is attached to the frame with neodymium magnets.
